

## I Will Get a Coronavirus Test

I might feel sick or have symptoms but don't feel bad.

I have a fever, a cough, or am having a hard time breathing. These are symptoms of the Coronavirus.

FEVER

COUGH

SHORTNESS  
OF BREATH

SORE THROAT

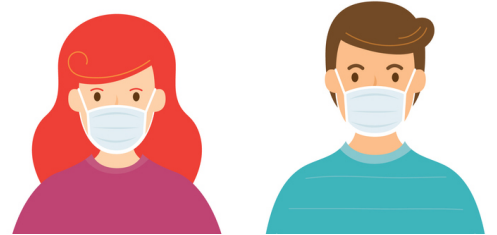

HEADACHE

My doctor wants me to get a test to find out what is making me sick. It could be the flu, a bad cold, or the new Coronavirus.

I will need to wear a mask when I am around anyone else until I get the test results. My Staff will wear a mask, too.

A nurse will come to my house to do the test.

The nurses will wear special equipment like a mask, gown, and goggle or face shield. My staff will wear these, too.

This is to stop germs from spreading to other people or to me.

The doctor or nurse will do a special test to see what is making me sick. To do the test, the doctor or nurse will need to put a q-tip inside my nose **or** inside my mouth.

It might feel weird or uncomfortable, but it will only take a few seconds. I can do it!

I will stay in my room to do activities, rest, and eat until I get the test results. If I have the virus, I will stay in my room until I feel better and the doctor says it is safe for me to come out again.
